LIBRARY REPORT

The Trustees of the Hampton Falls Library are pleased to make the following report:

During the year the Library has purchased 17 books of fiction, 10 books of non-fiction, 15 juvenile books, 20 Golden Books for the younger children and 6 Audobon Booklets. Among these books are "Your Dream House and How To Build It On Less Than \$3,500.", by Hubbard Cobb, and "The Baby Book of Knitting and Crochet", by Elizabeth Mathison for the adults with "Amos Fortune", a Newberry Award book by Elizabeth Yates for the young people.

The Library has received a file of Town Reports, which is nearly complete, dating back to 1842. This file is a gift from the late James H. Brown.

The Library is grateful for several book donations, the donors being: the Grange, the Rye Library, the Mrs. William Davis Estate of Exeter, Miss Louise Hawkins of Exeter, Miss Catherine Little of Hampton, Mrs. May Eurlen of Exeter, and Miss Mary Tatnell of Hampton donated two scrapbooks of famous pictures.

An index to our file of National Geographic Magazines, complete back to 1922, has been prepared for each of the following places; the Library, the School, and Miss Knight's branch library.

We would like to commend Miss Knight on her branch library which she maintains in her home. The children from the North end of the Town find great delight in going to Miss Knight's for their books.

Our heating unit has been converted to an oil burning outfit which has proved very satisfactory. Our Librarians, therefore, have been relieved of tending the fire and the janitor does not need to start the fire several hours before opening time.

The Board voted to open the Library on two afternoons each week, namely Wednesday and Saturday, since the heating problem was improved with the oil installation. This plan was to be tried for a period of not less than two months with Mrs. Edgerly acting as Librarian on Wednesday and Mrs. Batchelder on Saturday. The school children, under this plan, have been able to visit the Library on Wednesday afternoons under the supervision of a teacher. The results of this experiment have been so gratifying that the double opening will be the custom.

Respectfully submitted,

E. EMMONS SANBORN,
Secretary for the
Board of Trustees

REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board of Hampton Falls: I herewith submit to you my twenty-second annual report as Superintendent of your schools.

The current year began Wednesday, September 5, 1951 with a beginning enrollment of 61. Our largest grade is the first, with fourteen pupils registered in September. Since that time, new pupils have entered but, for purposes of comparison, we have considered initial enrollments only. Forty-four of our pupils are registered at neighboring high schools.

As an improved service to the children of our school, the Lions club of Hampton has purchased a Keystone Telebinocular and presented it to the schools of Supervisory Union No. 21. This machine more accurately tests the eyes of the pupils, measuring the sight for different defects, near and far sightedness, color blindness and movement of the eyes in vertical and horizontal directions. From these tests, defects will be found, and analyzed which were not found before. This contribution of the Lions club will aid materially in the school work of the pupils.

I wish to compliment our teachers on their willingness to devote their own time to professional courses that they might better serve the children under their care. The three teachers are now enrolled in a program conducted by the Harvard-Boston University extension service under the immediate instruction of Dr. Worcester Warren of the Boston-University staff. This is a fully accredited college grade course under the title of School and Community Relations. Sessions are held each Tues-

day afternoon with an enrollment of forty-seven teachers. We are pleased that teachers from other districts in New Hampshire and Massachusetts enrolled with us.

At the winter meeting of Supervisory Union No. 21 the purchase of a film strip library was authorized. These strips are strictly teaching aids, made by recognized teachers for presentation of school subjects. Since they are costly, it was felt that an individual district could not afford a library of its own. By joint purchase of the seven districts, the entire library will be available to all, the cost being apportioned according to the number of pupils who will be using the films. Pictures are always attractive to children. If arithmetic, geography, history and science can be presented in picture form, the lessons are learned more easily.

The program of our school compares favorably with that of similar towns. In addition to the prescribed courses, as recommended by the New Hampshire State Board of Education, our children have the benefit of work in Music and Art. We do lack a physical education program. If at all possible, provision should be made for a qualified instructor, probably in conjunction with other districts, to set up and conduct such a program. Physical health is important. It should be guarded well. Should we not consider such a service to the pupils in our school?

The Parent-Teacher Association continues its service to the schools. Through it, parents and teachers discuss their mutual problems. Where this is done, a common ground of approach can be worked out. This group is watchful of the welfare of our schools. Its aid is appreciated.

Hampton Falls has a fine school building and an ex-

cellent staff of teachers. Decisions of the school board are made with the welfare of the children in mind. With such a policy the standards of our school are assured.

Respectfully submitted,

ROY W. GILLMORE,

Superintendent of Schools.

February 19, 1952.

ART TEACHER'S REPORT

The main objectives of the art program are the development of imagination and creative ability, the encouragement of each child's love of beauty and the greater use of his artistic judgment in his daily life.

The children of the first four grades worked primarily with crayons and cut paper. The cut paper work not only develops a sense of design and color balance but also develops manual dexterity and coordination. The two groups also experimented with finger paint and clay and produced some very excellent work throughout the year.

The upper grades experimented with textile stencilling, each child carrying the project through from his own original design to the finished product. Some very good designs, stencilled scarves and place mats are made. They also worked with finger paints, poster paints and crayons. They did some research into the lives of our great artists and architects. They worked out some color harmony problems.

An attempt was made to give the students experience and training in a variety of mediums so that special talents might be recognized and encouraged.

In closing I wish to express my appreciation to all who have cooperated so splendidly in making this a successful year.

Respectfully submitted,

REGENIA P. MATTHEWS
